Dear Hiring Manager,

I am writing to apply for the DevOps Engineer position at your company. I have 3+ years of experience in Azure, AWS and GCP, Kubernetes, CI/CD automation, Infrastructure as Code and incident management. I would like to bring that experience to your team.

In my current role at Xoriant (client: NICE), I operate and automate a regulated Microsoft Teams compliance-recording platform on Azure that serves 70+ enterprise customers, mainly global banks. I automated our bot deployment setup with a script that generates the 20–25 configuration files each deployment needs from a single Excel input sheet, and I wrote KQL queries on Application Insights that removed recurring false critical alerts and exposed a genuine production defect. I also lead incident triage and root cause analysis, and I have built internal AI-assisted tooling with Claude to speed up log analysis and alert triage.

Earlier, at Amagi, I built CI/CD pipelines in GitHub Actions and Jenkins that made releases 42% faster. I ran ArgoCD-based GitOps deployments on Kubernetes and automated infrastructure with Terraform and Python, supporting 99.99% uptime through 3x user growth. At XchangeTechs, I provisioned AWS infrastructure with Terraform, kept releases under 2 minutes of downtime, and cut manual job execution time by 40% through automation.

I am strongest where reliability and automation meet: removing repetitive work, building observability that catches problems early, and keeping critical systems stable. I would bring the same approach to your team.

**Visa and relocation:** I am willing to relocate for this role, and I will arrange my own visa and pay my own visa and relocation costs. Visa sponsorship is not required. I would only need the company to provide the job offer, the work permit and the employment documents required to support the visa application. I am happy to discuss this and any timelines.

Thank you for your time. I would welcome the chance to discuss how I can contribute to your team.

Sincerely,
**Sarvesh Dharmadhikari**
